### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 9 and 13 – 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Kim (US 6,735,518 B2).

Regarding claims 1, 3, 4, 9, 14 - 18, Kim teaches a navigation system and method (title/abstract) comprising a location indicator device (300) that is configured to transmit location information through a terrestrial communication link (200; see fig. 1), wherein the location information is based upon on the location of the device (col. 1, lines 28 – 42); a GPS reception module (1170) that is configured to determine location information based on a GPS satellite signal (col. 5, lines 13 – 30 at least; it is inherent GPS signal includes latitude and longitude values; note also col. 3, lines 42 - 45) and a wireless reception module (1120) that is configured to determine its location relative to an object in a map based upon the location information from the device and the GPS module (col. 3, line 58 – col. 4, line 20 at least).

Art Unit: 3661

Regarding claims 2 and 13, Kim teaches an image display device (1130) that is configured to display a map of roads and location relative to the roads (col. 4, line 53 – col. 5, line 5 at least), the image being a PDA (as noted in col. 36 – 54 at least).

Regarding claims 6 - 8, Kim further teaches the indicator device being located where a road intersects and branches into two or more roads (see at least fig. 7).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 – 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim ('518) as applied to claim 1 above.

As discussed above, Kim teaches all of the limitations except for configuring the GPS reception module to output NMEA 0183 type location information. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made outputting this type of information is a well known and obvious expedient in the navigation art.
